

Greetings from the great nation of Jordan,

Arab Advisors Group is pleased to celebrate its 17th conference and symposium under the title “5G Summit” at The Ritz-Carlton Amman, on Tuesday, June 06, 2023. This is the first summit of its kind in Jordan, and we would like to take this opportunity to thank Her Royal Highness Princess Sumaya bint El Hassan, President of the Royal Scientific Society for her patronage and support.

Esteemed Arab Advisors Group 5G Summit participants, speakers, and partners: It is the privilege of my colleagues and I to extend a warm welcome to each one of you attending our 5G Summit. We gather here in Amman not just to discuss a mere technological advancement but to examine a revolution in progress that promises to shape our economies and the way we do business. Not only will the end goal transform our companies and our labor force but the journey itself will be a tremendous boost in this young and progressive digital age.

5G is a spectrum of new opportunities for people, companies, and nations. 5G is a paradigm shift in potential. It has the power to transform markets while galvanizing industries and modifying the digital ecosystem. More significantly, 5G will augment people’s lives.

Today, we stand at the threshold of a new era. 5G technology is not just an incremental improvement; it is a leap forward that promises to revolutionize the way we think and act. With unprecedented speed, capacity, and connectivity, 5G will stimulate job creation and radically improve the way we live and work.

We should not, however, underestimate the challenges that 5G faces. It requires cooperation and innovative thinking and a journey of transformation in policy and regulation. It is up to all of us to decide whether we want to lead the change or just watch it in awe.

Arab Advisors Group has cemented one core belief as a foundation for this 5G Summit; We shall lead the thought process, the field research and intellectual progression in Jordan and the Middle East.

Finally, through this summit we renew our commitment to accurate, independent, and relevant industry research. We pledge to be a major part of the 5G evolution for the betterment of our societies.

So, let us all work together to realize the potential of this remarkable technology.

Thank you,

Hakam Kanafani, Chairman,
Arab Advisors Group.
